Introduction

The Bank is incorporated in Uganda under the Companies Act of Uganda, 2012 and is licensed to transact Commercial Banking business under the Financial Institutions Act, 2004 as amended by the Financial Institutions (Amendment) Act, 2016.

Undertaking risk is an inherent part of our business. The Bank evaluates business opportunities in terms of the risk – reward relationship. The risks that the Bank takes are reasonable, controlled and within its financial resources and risk mandates. The diversity of the Bank's business requires the Bank to identify, measure and manage associated risks effectively. The risks are managed through a Risk Management Framework that enables process monitoring and is closely aligned with the activities of the Bank and in line with the guidelines given by Bank of Uganda.

The Board of Directors has the overall and ultimate responsibility for risk management in UBA Uganda. The Board comprises of eight (8) directors, all contributing a wide range of skills and experience to the Bank. The directors comprise of an independent non - executive chairperson, a Managing Director/ Chief Executive Officer, Executive Director – Business, four (4) independent non-executive directors and a non-executive director who is the Regional Chief Executive Office, UBA East & Southern Africa.

The Board of Directors carries out its responsibility through its standing committees. These are; Board Audit Committee (BAC), Board Risk Management Committee (BRMC), Board Finance and Compensation Committee (BFCC), Board Assets and Liabilities Committee (ALCO) and the Board Credit Committee (BCC).

The Board of Directors has delegated its power and authority to the Senior Management of the Bank through the various management committees which are responsible for ensuring compliance with the overall Risk Management Framework through a dedicated Risk Management Committee which provides regular updates to Executive Management and the Board on the risk profile of the Bank. The Board is responsible and approves the Risk Appetite of the Bank.

The Pillar 3 Risk Management Report

The Pillar 3 Risk Management Report provides a quarterly overview of the Bank's Risk Management Framework, Liquidity Risk Management, Regulatory Capital Profile and overview of the Risk Weighted Assets as at the end of the reporting period. The report is in line with Bank of Uganda guidelines on Pillar 3 disclosures as stipulated in the Internal Capital Adequacy Process and Pillar 3 Market Discipline Disclosure Requirements as well as the Financial Institutions (Liquidity) Regulations 2023.

The report has been prepared by Management, reviewed by Internal Audit and approved by the Board. The Board has reviewed the capital adequacy position of the Bank and it's Risk Management Framework and has deemed it appropriate to support the strategic aspirations of the Bank in the short and medium term. The Bank is adequately capitalised as at March 31, 2025. The information contained in this report is **unaudited**.

The results of the credit assessment are used to inform our lending decisions in the Corporate and Commercial space as well as selected SME transactions.

Liquidity Position and Liquidity Risk Management

The Bank is cognizant of the critical need for liquidity to run the business of the Bank. The Board has the overall responsibility of liquidity risk management strategy in the Bank. The Board sets the liquidity appetite which defines the level of liquidity the Bank is willing to deal with and has delegated to Board Asset and Liability Management Committee to oversee the liquidity risk framework of the Subsidiary and meets on a quarterly basis to review the compliance status of the strategy set out to achieve the desired liquidity profile of the Bank.

Executive Management through the Asset and Liability Committee meets at least on a monthly basis to review the liquidity position of the Bank and the parameters set out in the liquidity risk management framework to ensure compliance and where any breaches are identified, remedial mechanisms put in place to regularise liquidity. The Country Treasurer is mandated to manage the optimum liquidity position of the Bank.

The Internal Audit function performs independent reviews on the liquidity position of the Bank and the strategies in place to ensure maintenance of optimum levels of liquidity to meet obligations as and when they fall due and regulatory expectations spelt out in Bank of Uganda regulations/guidelines on liquidity management. The Internal Audit review process is in line with the annual approved Audit plan for the Bank.

The Bank through the Risk function performs regular liquidity risk stress testing based on scenario and sensitivity analysis. The testing models, scenarios and methodologies are regularly reviewed and approved to align with existing operating environment and emerging risks.

The Bank has in place Liquidity and Capital Contingency Plans with guidelines for activation if early indicators are triggered from the stress tests or actual breaches do occur. The Liquidity Contingency plan is regularly tested for resilience, relevance and effectiveness in times of liquidity crisis.

The Liquidity Management Framework/Strategy has embedded the liquidity coverage ratio, net stable funding and liquidity assets ratio as key benchmarks for testing the effectiveness of the liquidity plan in place. These are reviewed on a weekly basis by the Market Risk function in line with the Financial Institutions (Liquidity) Regulations of 2023.

Commentary on key Liquidity ratios

Liquidity Coverage Ratio (LCR) is the ratio of stock of highly liquid assets held by the bank to cover short term obligations over a 30-day period.

The increase in LCR is due to an increase in the stock of highly liquid assets given the additions of Available for sale securitites maturing within 91 days and Bonds maturing beyond 365 days. The LCR- Consolidated as at March 31, 2025 closed at 543.93%, LCR- LCY 245.4% and LCR-FCY 74.4% vis-a-vis 500.06%, 250.3% and 83.5% respectively as at December 31, 2024.

Net Stable Funding Ratio (NSFR) and is defined as the amount of available stable funding relative to the amount of required stable funding. Available stable funding in this case refers to the proportion of capital and liabilities expected to reliable over the time horizon considered by the NSFR, which extends to one year. The amount of required stable funding of the Bank considers the maturity profiles of both on-and off-balance sheet exposures. The ratio should always be greater or equal to 100%.

As at March 31, 2025, the NSFR closed at 221.69% from 518.63% as at December 2024 due to a reduction in the total available stable funds, due to reduction of the other liabilities coupled with an increase in the assets requiring more stable funding eg. loans and advances and balances due financial institutions and non-financial institutions abroad.
